## On the Spur of the Moment

By Roy K. Moulton

What dreams of conquest on the plain must surely rest within that look! If we could interview this brave, we knew that we could write a book. To gaze upon this simple child, untutored in our modern ways. Brought back to mind the memories of what we'd read of Cooper's days. We stood and marveled at this man, perchance much longer than we ought.

We had but one idea in mind, and that to try and read his thought.

what thinkest thou, oh simple child?"
we summed up nerve to ask,
He turned around and gazed at us, as
though it were a tiresome task.
"Til tell you, kiddo," answered he, "my
mind is quite distraught
About a cooling system for a new sixcylinder I've bought.
I've had nine automobiles now, and
worn them all right down to
junk,
And I'm determined this time not to let
them hand me any bunk."

feathers and much paint, very frequently put on to make things seem like what they aln't.

Berlin has doubled the tax on dachshunds, which is all right, as dashshunds take up nearly twice as much room as other dogs, having a much longer wheelbase.

## Voice of the People

# "UNCLE SAMURAI!"

# yet so comprehensive and truthful, that I venture to ask you to have it republished in your Sunday edition, that it may have greater publicity if, in your opinion, it would be proper to do so. Very truly yours, JOHN E. LAUGITON, JR. We take pleasure in complying with the above request:

Think the things Denny would do,
Just to take us kiddles through
The rough places all along life's
rugged pike;
He was always hippy when
He could get away from men
And lead a crowd of us young fellers
on the hike.

It comes up to make us sad
'Bout the bully times we had,
Swimming, boxing, boating and the
sports well done;
But he's crossed the styx for good,
He'd have stayed here if he could,
If for nothing else to help us kids
have fun.

Telephon e MADISON 803 CHAMBER OF COMMERCE

We take pleasure in complying withe above request:

A VOICE FROM HOLL (WOOD.

(For the Dispate.)

We sleep; so let them cone!
The field that once they fled,
Let them triumphant treas;
And o'er each grave
Their banners wave;
And beat the drum;
Such welcome as of yore
They find, alas! no more.
For we are dumb!

War With Japan.

In take of war between this country and Japan, would England be certain to take the part of the United States?

A SUBSCRIBER.

Japanese Good Citizens.

To the Editor of The Times-Dispatch:
Sir.—I wish to commend the excellent report of an interview with Dr.
Teusler, and the very sane editorial comment thereon, which appeared in a recent issue of your paper. While I have not been in Japan as long as Dr. Teusler has I have been there long enough, and have hed opportunities enough for observation while there, to be able to confirm all that he says. I wish to direct your attention to the striking contrast between the uniformly conservative and conciliatory ulterances of those who have been in Japan and are competent to form a just opinion—and especially of prominent Japanese themselves—and the stupid, incendiary declamations of fire-eating politicians and yellow journalists who are willing to sacrifice decency, to insult a people who merit our highest respect, and to run the risk of involving our country in war, merely to satisfy their morbid craving for sensationalism.

We boast of our superior civilization and our Christian principles, but does it not seem that the dignified bearing of the Japanese in this whole affair has been vastly more to their credit than the hysterical performances of our sister State in the far West have been to hers?

Not only have I been in Japan long enough to have some appreciation of the Japanese temper and characteristics and to form many warm and valued personal friendships among them, but during a recent brief stay in Callfornia I made a number of acquaint-

action for recovery of the estate. The great values were in the hands of the darks and rich institutions able to fight desperately for their spoils, and Burr at first avoided these and brought suit for a small farm in the upper part of the island, with the hope of establishing the principle on which the later actions were to depend. The suit for a small farm in the upper part of the island, with the hope of establishing the principle on which the later actions were to depend. the later actions were to depend. The holder of the farm had it suggested to him that if he would not seriously contest the suit, he might repossess himself of the land on his own terms. and Burr won his cause, which was then appealed and Burr won again. Then the Assyrians came down. The then the Assyrians came down. The holders of the valuable city property were assailed and terrified by every sort of writ of ejectment and suit to account and action for trespass that the ingenious Burr could devise, and

# Our Equipment

The equipment of the National State and City Bank is second only in importance to the safety it affords.

Depositors of this institution have at their disposal in our thoroughly up-to-date quarters every equipment and convenience which will in any way add to the promptness and pleasantness with which they may transact their financial affairs.

Small as well as large accounts, checking or savings, are welcomed.
